WITH BEAUTY**

Discover the 2025 Sustainable Companies:
Booth 11-A26
AsiaWorld-Expo
(11-13 November)

COSMOPACK ASIA
BEAUTY SUPPLY CHAIN SOLUTIONS
亞太區美容供應鏈展

Introductory Note

At Cosmopack Asia 2025, sustainability takes center stage with a remarkable lineup of exhibitors offering innovative, eco-friendly solutions. The companies featured in this e-book were carefully selected by our main partner SGS and from spontaneous applications submitted by exhibitors at Cosmopack Asia 2025.

This initiative aims to showcase innovative and sustainable solutions that are making significant strides toward sustainability. The evaluation process focused on the following criteria:

- Quality and environmental certifications
- ESG (Environmental, Social, and Governance) commitments
- The sustainability features of the products presented

The SGS logo is displayed in a bold, grey, sans-serif font. It is centered within a white rectangular area that has thin orange lines extending horizontally and vertically from its top, bottom, and right edges.

Sustainability has become essential in the cosmetics and hygiene sector. Companies must assess the environmental impact of products throughout their lifecycle — from ingredient sourcing and manufacturing to packaging, use, and disposal.

Adopting sustainable practices not only benefits the planet but also strengthens competitiveness among eco-conscious consumers.

Key areas to consider:

- **Sustainable ingredients:** use renewable, low-impact, and safe materials.
- **Eco-friendly packaging:** prefer recyclable, compostable, or biodegradable solutions.
- **Water conservation:** optimize water use in production and formulation.
- **Waste management:** design refillable and low-waste products.

As sustainability gains commercial value, greenwashing becomes a risk. Transparency, clear labeling, and independent verification are essential to ensure that environmental claims are credible and scientifically proven.

SGS Panel

As the world's leading testing, inspection and certification company, **SGS** is a trusted partner in advancing sustainability across industries.

Through our [IMPACT NOW for sustainability](#) initiative, we help organizations navigate the complexities of environmental, social, and governance (ESG) challenges by offering pragmatic, science-based solutions across four strategic pillars: **Climate, Circularity, Nature, and ESG Assurance**.

In the cosmetics and hygiene sector, SGS supports brands in building transparent, sustainable value chains—from sourcing and production to packaging and disposal—ensuring that environmental claims are credible and verifiable. This approach directly contributes to our **Strategy 2027** ambition to drive sustainable growth and create measurable impact for our clients and the planet.

Aromatic Enterprises Co., Ltd

Country: Taiwan Region
Booth: 3-B18 (Hall 3 - ASIAWORLD-EXPO)
www.aromatic.com.tw

Product name:

Sludge for Premium Fragrance & Makeup

Product description:

Sludge offers a dense, premium feel for sustainable, eco-friendly perfume caps and compacts.

Sustainability commitment:

Sustainability is at the core of Aromatic Enterprises. We are committed to creating beauty solutions that respect both people and the planet. From responsibly sourcing ingredients to prioritising ethical practices, we ensure our formulas are designed with environmental and social responsibility in mind. Our packaging uses sustainable, recyclable, and innovative materials that minimise waste, and we explore refillable solutions to further reduce our footprint. By integrating sustainable practices throughout manufacturing and operations, we aim to lower energy use and emissions while supporting fair and transparent supply chains. At every step, we strive to set a standard for environmentally conscious innovation, supporting a healthier planet for generations to come.

BUBBLY PERFUME

Aromatic Enterprises Co., Ltd

Country: Taiwan Region
Booth: 3-B18 (Hall 3 -ASIAWORLD-EXPO)
www.aromatic.com.tw

Product name:

Bubbly Perfume

Product description:

Alcohol-free serum with fragrance, hydration, and radiant skincare in bubbly drops.

- Alcohol-free bubbly perfume
- Releases actives
- Serum+ Perfume
- Promotes sustainable beauty

Sustainability commitment:

Sustainability is at the core of Aromatic Enterprises. We are committed to creating beauty solutions that respect both people and the planet. From responsibly sourcing ingredients to prioritising ethical practices, we ensure our formulas are designed with environmental and social responsibility in mind. Our packaging uses sustainable, recyclable, and innovative materials that minimise waste, and we explore refillable solutions to further reduce our footprint. By integrating sustainable practices throughout manufacturing and operations, we aim to lower energy use and emissions while supporting fair and transparent supply chains. Auber Packaging Co., Ltd

Country: China
Booth: 7-Q13 (Hall 7 - ASIAWORLD-EXPO)
www.cosmetic-tube.com

- 100%PCR
- Recyclable Eco Tube

Product name:

PCR Recyclable Tubes

Product description:

PCR recyclable tubes are commonly used for packaging.

Now Auber packaging can make tubes made from 100% recycled plastic material

Sustainability commitment:

Auber PCR:

- Reduce Plastic Pollution
- In compliance with EU standard
- 100% material safety
- Better Branding
- Easy to use
- Diversified Application

Ausmetics Daily Chemicals (Guangzhou) Co., Ltd

Country: China
Booth: 10-J01 (Hall 10 - ASIAWORLD-EXPO)
<https://www.ausmetics.com/>

Product name:
Ausmetics Agarose Waterless Cleansing Pearls

Product description:
Dry, single-dose agarose cleansing pearls: waterless and plastic-free, with mild, natural, and biodegradable surfactants; fully compostable.

Sustainability commitment:
Agarose Waterless Cleansing Pearls were born from the idea: “sourced from nature, used on the body, returned to nature.” We explored waterless formats, ran quick concept tests with travelers and zero-waste consumers, and landed on agarose for precise, single-dose use and full biodegradability. The name highlights the core material and ritual: add water, the pearl dissolves, impurities wash away. Our triple natural-surfactant blend (camellia seed, soapberry, glycolipid biosurfactants) cleanses effectively yet gently, reducing reliance on petro-surfactants.

Ausmetics Daily Chemicals (Guangzhou) Co., Ltd

Country: China

Booth: 10-J01 (Hall 10 - ASIAWORLD-EXPO)

<https://www.ausmetics.com/>

Product name:

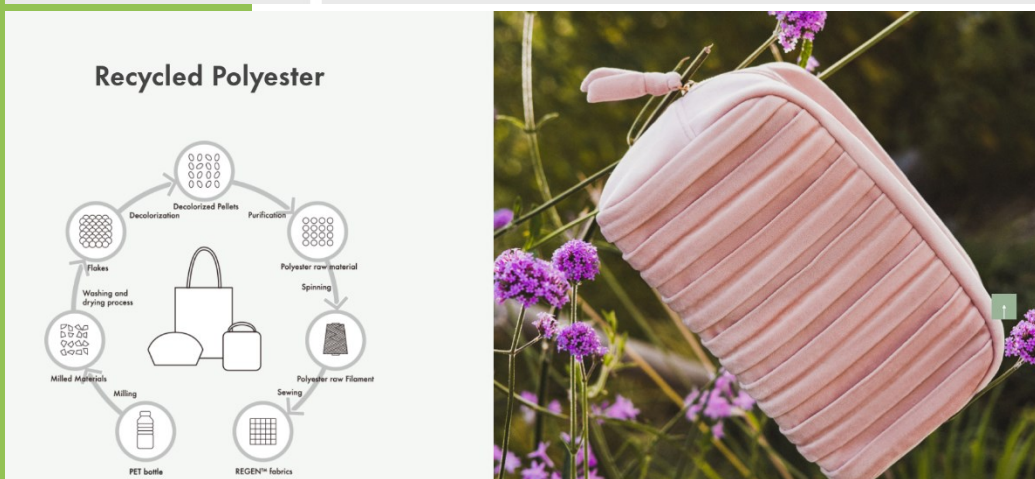

Seasons of Scent: 100% Natural Microfluidic Aromatherapy

Product description:

100% natural, alcohol-free microfluidic scent; biodegradable plant-oil capsules, recycled glass, solvent-free, low impact scent.

Sustainability commitment:

Ausmetics 100% Natural Microfluidic Aromatherapy elevates scent into a natural wellness experience inspired by the Eastern “four seasons” philosophy. Pure botanical essential oils are sealed in a naturally derived shell that isolates moisture, oxygen, and metal ions—minimizing oxidation and off-notes—while keeping the formula alcohol-free. Our in-house microfluidic chips generate transparent microcapsules with uniform particle size. In an induced-stress study (n=30) using fNIRS brain imaging, the pleasant-scent group showed a higher mean emotional valence (0.583) versus control (-1.38), $P < 0.05$ —findings that support our “Aroma-Induced Neural Efficiency” hypothesis.

Cosmetic Bag (Outer fabric and lining are both in 100% recycled polyester).
Got GRS certificate and purchase recycled polyester fabric made from recycled plastic bottles.

At BeeGreen, we believe in an environmental approach, to make all our operations more sustainable and to reduce our impact on the environment. For a better respect to our planet and people. The materials we like to use for our products are “eco-friendly”, which means that their production process has a low impact on the environment.

Cixi Aolijue Metal Products Co., Ltd.

Country: China
Booth: 9-C13 (Hall 9 - ASIAWORLD-EXPO)
www.aolijue.com

Product name:

1. Aerosol cans and screw bottles
2. Jars and cans
3. Beverage bottles

Product description:

Virgin aluminum bottles (also available in 100% PCR) to meet your specific sustainability needs.

Sustainability commitment:

We champion aluminum's infinite recyclability through targeted actions:

1. Industry Education: We showcase our GRS-certified, 100% PCR aluminum bottles, cans & tins at global trade shows, educating brands on this proven sustainable solution.
2. Consumer Awareness: We run clear social media and web campaigns promoting "100% Recyclable Forever" packaging and the value of choosing 100% PCR materials.

We lead by example, providing the tangible tools to advance the industry's circular economy.

The sustainable lightness of our strip

Discos S.r.l.

Country: Italy

Booth: 3-D01-A01 (Hall 3 - ASIAWORLD-EXPO)

www.discos.it

Sustainable Process:

Our plastic waste becomes a new primary source reused for the production of new strips.

Sustainability commitment:

Discos is concerned with minimizing waste and scrap by using 100% renewable energy.

SMART.
SUSTAINABLE.
STUNNING.

HCT by kdc/one

Country: Hong Kong
Booth: 3-C09 (Hall 3 - ASIAWORLD-EXPO)
www.hctgroup.com

HCT
by kdc/one

Product name:

Smart Sustainable Solution

Product description:

We offer the largest sustainable stock library in the industry, knowing one solution doesn't fit all. HCT innovates in reduce, reuse, replace & recycle to lead sustainable beauty design.

Sustainability commitment:

HCT is committed to minimizing the detrimental effects of oil-based plastics by creating packaging that is designed to be recycled and promoting the use of recycled plastics, bio plastics, and refillable packaging solutions.

Meiyume (Hong Kong) Limited

Country: Hong Kong
Booth: 3-D07 (Hall 3 - ASIAWORLD-EXPO)
<https://meiyume.com/>

MEIYUME

Product name:

1. IRIS Collection
2. GAIA Collection
3. ATHENA Collection

Product description:

Refillable, recyclable, and PPWR-ready—aluminium / PCR packaging for the masstige / prestige market.

Refillable, reduced, and recyclable—Meiyume creates packaging that drives sustainable beauty. Meiyume's plants and sourcing hold EcoVadis Gold, recognising sustainability and responsibility.

Sustainability commitment:

Environmental assessment: Refillability

By refilling your packaging 3 times, it saves: 55% CO2 emission, 51% fossil energy, 56% water consumption

Environmental Assessment: Aluminium

- Lightweight packaging (-50% in weight*)
- Reduction of transportation footprint & cost (-49% in shipped volume*)
- Lower packaging to product ratio (-34% of packaging volume*)
- Infinitely recyclable

*comparison 250ml Iris Jar with 250ml monomaterial PP Jar showcased in our Elements collection (#E29)

Ningbo Meichang Packaging Technology Co., Ltd

Country: China

Booth: 7-Q29 (Hall 7 - ASIAWORLD-EXPO)

<https://www.plasticpumpbottles.com/>

Ø49

50/80/100/120/150ml

Sustainable Process:

Our production process complies with ISO 14001 certification, which helps companies improve their environmental performance by setting policies, identifying environmental aspects and impacts, and setting objectives to reduce waste, conserve energy, and ensure legal compliance.

Refillable packaging

All parts are made of mono material and it's refillable!

PACKTORY

Packtory.Co.,Ltd

Country: South Korea

Booth: : 3-C07 (Hall 3 - ASIAWORLD-EXPO)

www.pack-tory.com

Product name:

- Refillable packaging
- Metal free design
- Mono material
- PCR resins are available

Product description:

Refillable packaging - It enables easy reuse, reducing plastic and aiming to sustainable lifestyle.

- Metal-Free Pump & Mono-Material Jar – Fully recyclable
- PCR-Recycled resins reducing virgin plastic.

Sustainability commitment:

We continue to research, resource, develop and expand our sustainable packaging solutions offerings

Rivta Culture Equipment (ShenZhen) Co., Ltd

Country: China

Booth: **5-A16** (Hall 5 - ASIAWORLD-EXPO)

www.ecorivta.com

Rivta

Product name:

Apple Leather Cosmetic Bag

Product description:

Luxury Bag Made of Certificated Apple Leather, instead of traditional animal leather or Pu Leather. Our vegan leather goods use recyclable and biodegradable packaging.

Sustainability commitment:

Built on eco-friendly materials and using bags as a medium, we champion sustainable fashion; offering a vast and diverse range of sustainable materials to meet the unique customization needs of clients worldwide.

Sustainable materials for the most eco-friendly packaging:

- Recycled Fabrics: to minimize the environmental impact. Recycled PET, Recycled Nylon, Recycled Cotton.
- Natural & Organic Fabrics: healthy, skin-friendly, biodegradable and free of harmful chemicals. No burden even for pregnant women and babies. Pineapple Fiber, Banana Fiber, Bamboo, Lyocell, Jute.
- Vegan Leather: a material that mimics leather but is created from artificial or plant products instead of animal skins. Vegan leather is eco-friendly, fashion and cruelty-free. Recycled PU, Recycled PVB, Bamboo Leather, Apple Leather.

SGD Pharma

Country: China
Booth: 3-B07 (Hall 3 - ASIAWORLD-EXPO)
www.sgd-pharma.com

Product name:

Nova

Product description:

The optimal light weighting solution.

Nova reduces raw material consumption and energy use while retaining the robustness.

Sustainability commitment:
